(A separate application is required for each class of service at the same address...i.e, one for Commercial Service and one for Fire Protection)

Line Size _____ Meter Size _____ Max. GPM Demand (if known) _____

Contractor Name _____ Phone _____

TAP-CONNECTION FEES: The minimum connection fee for a standard, three-quarter inch (3/4") residential service and meter, payable with the application, is **\$750**. The fee includes excavation and connection of service to main, up to fifty feet (50') of service line from point of connection at the main to the meter, excavation and back-fill of the street or right-of-way and property up to and including the meter pit, meter and all associated parts, equipment and labor. Service line in excess of fifty feet (50') is billed to the property owner at the rate of \$5.00 per

foot. For the purpose of implementing regular billing of the applicable monthly service charge and any water used at then-current rates, the completion date of the service connection (when the meter is set) will be considered the turn-on date for billing, unless otherwise requested. In almost all cases, the meter will be located at a point not to exceed 10 (ten) feet from the connection at the main, or from the edge of pavement or back of curb, whichever is applicable. If such location is not feasible, an alternate location will be designated by the city.

A schedule of tap fees and monthly charges for both residential and larger services/meters as required for commercial, industrial, and/or fire protection, is available from the billing office at City Hall. Fireline connections are maintained by the utility up to the Right-of-Way line, at which point they become the customer's responsibility. If necessary, the City reserves the right to require support documentation from a

qualified engineer for the purpose of determining and approving the correct line and/or meter size for any service. The city shall have final approval.

NOTICE: *The City assumes no responsibility or liability for the interruption of water service at any time, and the City shall have the right to discontinue service to the property for any of the following reasons:*

- 1. When the safety of the general public is endangered or public convenience and necessity requires;*
- 2. Defective plumbing and/or equipment on the premises;*
- 3. Maintenance and/or construction purposes as required from time to time;*
- 4. Any violation of City rules and regulations governing this service;*
- 5. Failure to pay charges for commodities and services rendered when same are due, including installation/relocation costs.*

Regardless of the classification of new or existing service, all potable water plumbing on the customer's side of the meter must conform to the current *National Plumbing Code* before a meter will be set or turned on. Additionally, appropriate, approved backflow protection is required on all new commercial, industrial, and fireline services. Sub-meters and "piggybacked" services such as from firelines or other water services are prohibited.

In consideration for granting a connection to the potable water system of the City of Huntingburg, ***I hereby agree to the following:***

1. I have read and understand this application including all associated fees and charges, and to abide by the rules and regulations of the City of Huntingburg Water Utility, as they may be revised and modified from time to time. ***PROPERTY OWNER INITIAL***_____
2. To grant a General Utility Easement to the City of Huntingburg, et al, for the purpose of installing and/or maintaining utility services up to and including the meter(s) and, if applicable, any contiguous utility main lines whether new or existing, from ingress to egress points on the property. ***PROPERTY OWNER INITIAL***_____
3. The homeowner is responsible for any replacement and/or repair of landscaping or crops that may be disturbed or damaged for the purpose of installing, relocating, and/or modifying the water service (typically, but not limited to, grass/grass re-seeding, and perpetual backfill of trench line). ***PROPERTY OWNER INITIAL***_____
4. It is acknowledged and agreed that the City is under no obligation or liability for service interruptions such as may be required because of or caused by unforeseen circumstances or for normal maintenance as is required from time to time. Additionally, the city is not required to serve any property until such time as adequate water distribution mains have been installed and water is available to the property. ***PROPERTY OWNER INITIAL***_____
